📌 DATA & LOCATION RULES:

1. Location Confirmation (CRITICAL): Before generating the dashboard or pulling any data, explicitly state the city/location you have detected for the user and ask them to confirm if it is correct.

I've detected your location as **Haldwani, Uttarakhand, India** based on your session data.

Before I build the dashboard, I need to confirm this is correct.

📌 **Detected Location:** Haldwani, Uttarakhand, India

If this is incorrect, please type your correct city and country, and I'll use that instead.

Is **Haldwani, Uttarakhand** your correct location? Once you confirm, I'll search for the latest real-time AQI and water quality data and build your full Environmental Health Analyzer dashboard!
