

Your first chat with Claude ▾

Welcome, Nidhi! I'm Claude.

Bring me anything—a tough problem, a half-formed idea, something you need to write. We'll figure it out together.

Where do you want to start?

Create a 30-day learning roadmap. Include:

- Weekly milestones
- Daily tasks
- Resources
- Projects
- Final outcome Make it practical and beginner-friendly. Make roadmap in one page in the form of an image so it can be shared as an image in a linkedin post. make it professional and use eye catchy template

What topic should the roadmap be about? Let me know so I can tailor it perfectly for you!

Q: What is the 30-day learning roadmap for?

A: [No preference]

Q: What's your experience level?

A: Intermediate

📅 30-Day Learning Roadmap

Intermediate Level · Build real skills · Ship real projects

● Milestone ● Daily Focus ● Resource ● Project ● Outcome

WEEK 1

Milestone: Master the fundamentals & build your first mini-project

Days 1–7 · Solidify core concepts, hands-on practice, code every day

Daily Focus

Day 1–2 · Concepts review
Day 3–4 · Hands-on exercises
Day 5–6 · Build & debug
Day 7 · Review & reflect

🕒 1.5–2 hrs/day

Resources

📺 YouTube crash courses
📖 Official documentation
🔧 freeCodeCamp / Codecademy
📝 Notion / Obsidian notes

Free & beginner-friendly

Week 1 Project

✂️ Mini-project using core skills
Recreate a simple feature
Document what you learned
Push to GitHub

Est. 3–4 hrs total

WEEK 2

Milestone: Go deeper · Tackle real-world patterns & problem-solving

Days 8–14 · Intermediate patterns, debugging skills, peer review

Daily Focus

Day 8–9 · Deep dive topics
Day 10–11 · Pattern practice
Day 12–13 · Debug & optimize
Day 14 · Peer code review

🕒 2 hrs/day

Resources

🎓 Udemy / Coursera course
📰 Medium / Dev.to articles
💡 Stack Overflow deep-dives
💬 Discord study communities

Structured + community

Week 2 Project

🔧 Extend Week 1 project
Add 2 new features
Write a README.md
Share & get feedback

Est. 4–5 hrs total

WEEK 3

Milestone: Build a full-featured project end-to-end

Days 15–21 · Applied learning, architecture decisions, deployment basics

Daily Focus

Day 15–16 · Plan & scaffold
Day 17–19 · Core build sprint
Day 20 · Testing & polish
Day 21 · Deploy & demo

🕒 2.5 hrs/day

Resources

🚀 Vercel / Netlify / Railway
👤 GitHub best practices
📦 Open source codebases
🔧 Testing frameworks docs

Production mindset

Week 3 Project

🌐 Full-featured live project
Deployed to the web
Custom domain optional
Add to portfolio

Est. 6–8 hrs total

WEEK 4

Milestone: Refine, reflect & present your 30-day portfolio

Days 22–30 · Polish, write-ups, networking, plan next 30 days

Final Outcome

3 shipped projects · GitHub portfolio · Deployable skills · LinkedIn post ready 🚀

Here's your professional 30-day learning roadmap, ready to screenshot and share on LinkedIn!

Here's what's packed into it:

4 Weekly Milestones

- Week 1: Master fundamentals + first mini-project
- Week 2: Deeper patterns + peer review
- Week 3: Full-featured end-to-end project + deployment
- Week 4: Refine, reflect, present your portfolio

Daily structure — each week maps out specific daily focus areas so you always know what to work on, with realistic time estimates (1.5–2.5 hrs/day).

Resources progress from free beginner materials (YouTube, freeCodeCamp) → structured courses (Udemy/Coursera) → production tools (Vercel, GitHub best practices).

3 escalating projects — each week builds on the last, ending with a live deployed project in your portfolio.

Final outcome — 3 shipped projects, a GitHub portfolio, and deployable skills by Day 30.

To share on LinkedIn, just take a screenshot of the roadmap image above. Want me to customize it for a specific skill (Python, Web Dev, Data Science, etc.) or adjust the color scheme?
